

State Fisheries Genomics Lab Tissue Sample Intake Form

Please complete the top part of this form and send to: kathleen.omalley@oregonstate.edu
Make arrangements with us prior to dropping off the tissue samples and include a copy of this form with your samples.

Project dropping off samples:

Coos/Coquille/Tenmile Fish District

Person dropping off samples: Chris Stephens

Phone: 541-888-5515

Email: Christopher.L.Stephens@state.or.us

Description of samples (e.g. species, collection locations, collection dates, collection methods, number of samples, life stage; may attach spreadsheet):

There are 25 Chinook samples and 3 chum samples. The Chinook samples were collected on spawning surveys while the 3 chum samples were collected from fish in a trap. I've included a spreadsheet with all the data.

If applicable, known origin (e.g. natural or hatchery):

All samples are from natural Chinook and Chum

Sample type (e.g. fin tissue, scale, muscle, etc):

Fin tissues

Storage method (e.g. dry, 95% ethanol, RNA later, etc):

Vials were sent from the State Fisheries Genomics Lab, I think the vials have 95% ethanol.
